

IMPORTANT

Administrator Privileges Required

Installing these components requires **Administrator access** on the computer.

If you do not have admin rights, please contact your **IT Support team** before continuing.

These components install Microsoft system libraries used by IMDSPlus/PAMS and must be installed with elevated permissions.

Overview

This guide installs and verifies the four Microsoft components required for the **64-bit version of IMDSPlus/PAMS**:

1. **.NET 8 Desktop Runtime**
2. **Visual C++ Redistributable 2015–2022 (x86)**
3. **Visual C++ Redistributable 2015–2022 (x64)**
4. **Microsoft OLE DB Driver 19 for SQL Server**

These components ensure the application can run correctly and connect to SQL Server.

1. Install .NET 8 Desktop Runtime (Windows Only)

IMDSPlus/PAMS requires the **.NET 8 Desktop Runtime** to run on Windows PCs.

Newer version of .NET (such as .NET 9 or .NET 10) do not include .NET 8 and will not run IMDSPlus/PAMS.

Please ensure you install .NET 8 Desktop Runtime (8.x.x)

Step 1 — Download the Runtime

Download from the official Microsoft site:

.NET 8 Desktop Runtime (Windows)

<https://dotnet.microsoft.com/en-us/download/dotnet/8.0>

On the page, scroll to **Run apps – Runtime** and select:

- **.NET Desktop Runtime 8.x.x (x64)**

 Make sure you choose **Desktop Runtime**, not the SDK or ASP.NET Runtime.

Direct download link to .NET Desktop Runtime 8.0.26:

<https://dotnet.microsoft.com/en-us/download/dotnet/thank-you/runtime-desktop-8.0.26-windows-x64-installer>

Step 2 — Install the Runtime

1. Right-click the downloaded installer
2. Select **Run as administrator**
3. Accept the license terms
4. Click **Install**

The installer writes to `C:\Program Files\dotnet\` and updates system-wide settings, which requires admin rights.

If you see a “Repair” button instead of “Install”:

“No action is needed. .NET 8 Desktop Runtime is already installed. You may close the installer.”

Step 3 — Verify Installation

Open PowerShell or Command Prompt and run:

```
dotnet --list-runtimes
```

You should see an entry similar to:

```
Microsoft.WindowsDesktop.App 8.0.xx
```

2. Install Required Visual C++ Redistributables

These redistributables are required by the OLE DB Driver and other Microsoft components.

Download Links

1. **Visual C++ Redistributable (x86)**
https://aka.ms/vc14/vc_redist.x86.exe
2. **Visual C++ Redistributable (x64)**
https://aka.ms/vc14/vc_redist.x64.exe

Installation Order

1. Run **vc_redist.x86.exe** → click **Install**
2. Run **vc_redist.x64.exe** → click **Install**

If either installer shows **Repair**, it means the component is already installed. You may close the installer.

3. Install Microsoft OLE DB Driver 19 for SQL Server

This driver allows IMDSPlus/PAMS to connect securely to SQL Server databases.

Download Link

Microsoft OLE DB Driver 19 for SQL Server

<https://go.microsoft.com/fwlink/?linkid=2318101>

Installation Steps

1. Run **msoledbsql19.msi**
2. Accept the license agreement
3. On the **Feature Selection** screen:
 -  Keep **OLE DB Driver** selected (required)
 -  **Uncheck "SDK"** — not needed for end users
4. Click **Install**
5. Click **Finish**

The SDK is only for developers building applications. End users should not install it.

Restart Required

After installing the OLE DB Driver, **restart your computer** to ensure all components load correctly.

Troubleshooting

"Access Denied" or "Administrator Required"

- The installer must be run as Administrator.
- Contact IT Support if you cannot elevate permissions.

Installer Hangs or Freezes

- Another installation or Windows Update may be running.
- Restart your computer and try again.

Components Not Detected After Installation

- A system restart may be required.
- Restart and verify again.

"Repair" Option Appears

- This means the component is already installed..
- You may continue with the next step.

Contact IT Support

If you encounter issues or do not have administrator privileges, contact your IT Support team.
Provide:

- A screenshot or description of the error.

Send this information to **REJIS IMDSPlus/PAMS support** for further assistance.

Version Information

as of May 11, 2026

- **.NET 8 Desktop Runtime** 8.0.26
- **OLE DB Driver Version:** 19.4.1
- **VC++ Redistributable:** 2015–2022 (v14.50.xxxxx)
