

OLE DB Driver 19 for SQL Server - Installation Instructions

Overview

This process will install **Microsoft OLE DB Driver 19 for SQL Server** and its prerequisites on your Windows computer. This is required for the 64-bit version of IMDSPlus/PAMS.

IMPORTANT: Administrator Privileges Required

This installation requires Administrator privileges. If you do not have administrator access on your computer, please contact your **IT Support team** for assistance.

Prerequisites

Before running the installer, ensure:

- Windows 10 or later (64-bit)
 - Administrator access to the computer
-

Installation Steps

Step 1: Run the Installer

1. Open IMDSPlus/PAMS Logon.
2. Go to **Diagnostics** → **Choose a Diagnostic** → **Install-OleDbDriver19**

The installer will automatically:

- Install Visual C++ Redistributable 2015-2022 (x86)
- Install Visual C++ Redistributable 2015-2022 (x64)
- Install Microsoft OLE DB Driver 19 for SQL Server

Step 2: Follow On-Screen Prompts

- The script will display progress and status messages
- If existing installer processes are detected, you may be prompted to terminate them
- Wait for the installation to complete

Step 3: Restart if Required

A system restart may be required after installation. If prompted, please restart your computer to complete the installation.

Manual Installation (If Script Fails)

If the automated script fails, you can manually download and install the components from Microsoft:

Download Links:

1. **Visual C++ Redistributable (x64)**
https://aka.ms/vc14/vc_redist.x64.exe
2. **Visual C++ Redistributable (x86)**
https://aka.ms/vc14/vc_redist.x86.exe
3. **Microsoft OLE DB Driver 19 for SQL Server**
<https://go.microsoft.com/fwlink/?linkid=2318101>

Manual Installation Order:

1. Download all three files above
2. Run `vc_redist.x86.exe` - click "Install" and wait for completion
3. Run `vc_redist.x64.exe` - click "Install" and wait for completion
4. Run `msoledbsql19.msi` - follow the setup wizard (see details below)
5. **Restart your computer**

Installing MSOLEDBSQL19 Manually

When running the `msoledbsql19.msi` installer manually:

1. Accept the license agreement
2. On the **Feature Selection** screen:
 - ☒ Keep **"OLE DB Driver"** selected (required)
 - ☒ **UNCHECK "SDK"** - this is not needed for normal use
3. Click **Install** and wait for completion
4. Click **Finish**

Note: The SDK (Software Development Kit) is only needed for developers building applications. End users should **not** install the SDK.

Troubleshooting

"Access Denied" or "Administrator Required" Error

- You must run the installer as Administrator
- **Contact your IT Support team** if you don't have admin access

Installation Hangs or Times Out

- Another installation may be in progress
- Close any pending Windows updates or other installers
- Restart your computer and try again

Components Not Detected After Installation

- A system restart may be required
- Restart your computer and run the script again to verify

Still Having Issues?

- Check the log file: **Install-OleDbDriver19.log** (same folder as the script)
 - Contact your **IT Support team** with the log file for assistance
-

Contact IT Support

If you encounter any issues during installation or do not have administrator privileges, please contact your IT Support team for assistance. Provide them with:

- The error message (if any) and a screenshot
- The log file: **Install-OleDbDriver19.log**
- The diagnostic output from **View Diagnostic** (copy and paste)

Email all of this information to REJIS IMDSPlus/PAMS support.

Version Information

- **OLE DB Driver Version:** 19.x
- **VC++ Redistributable:** 2015-2022 (v14.x)
- **Script Date:** April 2026
